EASIPRINT

SIMPLE TO INSTALL

The Easiprint is easily mounted on a fixed bar across the material to be marked. Vertical adjustment on the unit gives print on/off positions. The printer is driven by frictional contact between the rubber tyres on the type drum, and the material.

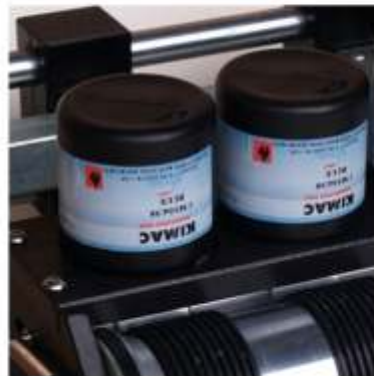

APPLICATIONS

The Easiprint is used to apply identification marks, use by dates, recyclelogos, customer product names etc onto material which is continuously moving, or indexing, and where a repeat print is required. Some typical applications are on extruded film, bag printing, steel sheets, plastic window extrusions, shrink wrap

film, cardboard core windings, Gypsum board, edge pack board, backs of mirrors and paper.

INKS

Ink Cartridges are available in a range of ink types and colours to suit most surfaces. We can advise you on the most suitable range for your product.

LOCKTYPE

An extensive range of LOCKTYPE styles is offered to create a message by simply press fitting the type into the HDPE locking rings or ribbed rubber based sleeve. A LOCKTYPE brochure is available illustrating the full range.

MAINTENANCE

Built to require the minimum of maintenance and running cost. Three months' world wide warranty.

SPECIFICATION

Print Area ESP01:

Power Requirements:

Speed and Drive:

Print Length 240 mm x Print Height 25 mm

None

Friction driven by continuously moving packaging material.
