EASIPACK 200 series

SIMPLE AND EFFICIENT

The Easipack printers all use replaceable pre-impregnated Plastic-Ink Rollers and interchangeable LOCKTYPE Type. They are easily mounted to print on either the top, bottom or side of a product. These printers are widely used where zero down time is a necessity and lowest print cost per product is required. When only changing the code or best before date once a day or once a week, the Codapack printers are the best.

LOCKTYPE

An extensive range of LOCKTYPE styles is offered to create a message by simply press fitting the type into the HDPE locking rings or ribbed rubber based sleeve. A LOCKTYPE brochure is available illustrating the full range.

PLASTIC-INK ROLLERS

These ink rollers are quickly placed on the Easipack range of printers to give a dense quality print on to porous surfaces such as cartons, trays and paper sacks. These long life pre-inked rollers are disposable, giving a clean and efficient inking system. They are available in black.

FIBRE AND SPONGE ROLLERS

For non-porous surfaces either of these rollers can be used with special liquid inks

MODEL

EPK200 CA Cart Auto feed
EPK200 BA : Sack Auto feed (Vaccume)
EPK200 BM: Manual feed

SPECIFICATION

Print head 3 unit/ machine
Print Area 100 mm. x 450 mm./ 1 unit
Power required: 220/240V, 50/60 Hz.
